

Candidate violation

SEVERITY HIGH · 61.4/100

Location	Ain Dara, Mount Lebanon
Coordinates	33.76563 N, 35.71611 E
Change area	1.82 ha (18,200 m2)
Window	2018-05-01..2018-09-30 -> 2024-05-01..2024-09-30
Type	agriculture (confidence 0.55; claude)
Evidence	NDVI drop 0.402, BSI rise 0.325
Severity	high 61.4/100 - overlaps Shouf Biosphere Reserve (protected area) +35, change area 1.82 ha +7.3, signal strength (NDVI 0.402, BSI 0.325) +13.6
Flags	overlaps Shouf Biosphere Reserve (protected area)
Legal basis	Protected area - WDPA-designated (confirm exact boundary with the Ministry of Environment)
2nd opinion	downgrade - The change from dense green vegetation to exposed brownish soil is consistent with seasonal harvest or agricultural ploughing rather than a permanent land-use change, making the 'agriculture' label partially appropriate but the confidence overstated given the likely cyclical nature of the activity.
Reasoning	The before image shows dense green vegetation/forest cover, while the after image shows cleared land with exposed soil/earth tones. This pattern is consistent with agricultural land clearing or deforestation for farming purposes, where natural vegetation has been removed to prepare land for cultivation.
