

Candidate violation

SEVERITY CRITICAL · 85.9/100

Location	Bourj Hammoud, Beirut
Coordinates	33.90234 N, 35.55468 E
Change area	21.92 ha (219,200 m2)
Window	2017-04-01..2017-10-31 -> 2024-05-01..2024-09-30
Type	quarry_expansion (confidence 0.72; claude)
Evidence	NDVI drop -0.396, BSI rise 0.198
Severity	critical 85.9/100 - within the coastal public-domain setback +30, quarry-like change outside any permitted zone +25, change area 21.92 ha +20.0
Flags	within the coastal public-domain setback; quarry-like change outside any permitted zone
Legal basis	Maritime public domain - 150 m setback from the coastline (proxy width)
2nd opinion	confirm - The before image shows a dark vegetated or shadowed surface while the after image reveals a bright, highly reflective bare surface with structured edges consistent with quarry expansion or excavation activity, not explainable by seasonal, shadow, or tidal changes.
Reasoning	The before image shows a dark area with minimal visible features, while the after image reveals exposed light-colored rocky/sandy terrain with what appears to be excavated material and infrastructure. This pattern of dark vegetated/undisturbed land transitioning to bright exposed rock/earth with rectangular cut features is characteristic of quarry expansion, which is common in Lebanon's mountainous regions.
